The Maqui Berry is something known as the Patagonia Superfruit. Any type of super food means that it is loaded with antioxidants and other wellness supplements that do amazing things for you're body. Patagonia, where the Maqui Berry is found is actually one of the cleanest places on Earth, which makes it such an ideal condition for growing this super berry. It has been a staple in the diet of the Mapuche Indians, who consistenly have one of the longest life spans of any ethnic or world group alive today.
